1. Which type of Solar system are interests you?

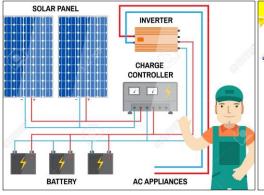

Island/Off-grid system – operates without the utility grid and uses **batteries** to store energy – **exact** daily energy consumption required

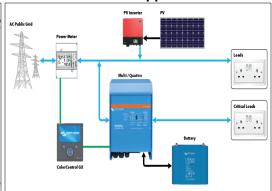

Grid-tie System – operates with utility grid; allows for net metering, requires application with City of Windhoek

Hybrid System – smaller battery backup with the utility Grid, works great with prepaid meters and zero feed-in - no application

2. Please specify the address location/GPS coordinates of the system to be installed: Ongete street, Okuryangava, Windhoek

- 3. Which type of electricity meter do you currently have?

4. Estimated monthly electricity consumption (kWh - units or in N\$):

None, we use lambs

5. 1-phase or 3-phase power?

1-phase 230V -Conventional households with Live and Neutral

3-phase 380V -Farms, Industrial, Commercial, homes with large energy demand
